

Robotics CCA Tackles Global Issues at FIRST LEGO League 2025

The team built and designed robots to carry out missions focused on ocean conservation

The judges were impressed by our team's teamwork and problem-solving skills

APSN Katong School's Robotics CCA participated at the FIRST LEGO League 2025 on 28 March, presenting smart tech solutions like tracker robots and buoys designed to combat address illegal fishing.

As the only special education (SPED) school among 300 participating teams, they completed five missions— earning praise for their creativity, teamwork, and resilience.

Well done, Team Katong Ocean Heroes!

Robotics CCA Tackles Global Issues at FIRST LEGO League 2025

The team presented their idea on solving illegal fishing using smart buoys and Tracker Robots

As the only SPED school among over 300 participating teams across Singapore, our team successfully completed 5 missions
